Target covers scope 3 emission sources including residential electricity consumption, residential natural gas (heating), ground travel, commercial air travel, rail travel, and hotel accommodations.

Plan for achieving target, and progress made to the end of the reporting year

By 2035, we are committed to achieving a 30% reduction in scope 3 emissions generated by business travel compared to our 2022 baseline year. We plan to reduce our business travel by leveraging technology for video conferencing, encourage remote work, embrace virtual events, implement travel policies, consolidate trips, consider alternatives to air travel such as rail, and emphasize client relationships to reduce the need for frequent in person meetings.

During the reporting year, we have reduced our leased office spaces decreasing our scope 2 emissions for office electricity consumption.
